MACHINES AND EQUIPMENT FOR STRINGING,  
LAYING AND RAILWAY SECTORS

**OMAC**  
ITALY

SINCE 1954

## MADE IN ITALY

PROUDLY LOCATED IN THE CRADLE OF STRINGING, OMAC EMBODIES THE ITALIAN TRADITION, EXPERIENCE AND INNOVATIVE TECHNOLOGY FOR THE MOST ADVANCED SOLUTIONS.

## CUSTOMER SERVICE

A TEAM OF SPECIALIZED TECHNICIANS ALWAYS BY YOUR SIDE FROM THE CHOICE OF THE MOST SUITABLE EQUIPMENT, TO TAKE CARE OF YOUR MACHINE AND INCREASE ITS LIFETIME.

## TECHNICAL INNOVATION

OMAC RESEARCH AND DEVELOPMENT TEAM APPLIES THE BEST AVAILABLE TECHNOLOGY AND ENGINEERS THE MOST INNOVATIVE MACHINES AND EQUIPMENT. 4.0 TECHNOLOGY, COMBINED WITH A SUSTAINABLE APPROACH, ARE OMAC TECHNICAL ASSETS FOR THE FUTURE.

## CUSTOM-MADE

FOR OMAC, THE REAL CHALLENGE IS TO CREATE WHAT CUSTOMERS WANT TAILORED TO THEIR NEEDS, THE PERFECT SOLUTIONS SUITABLE FOR EVERY PROJECT.

ISO 9001

BUREAU VERITAS  
Certification

# FORWARDING INNOVATION WITH ITALIAN TRADITION

Since 1954 the family business of OMAC has been focused on the design and production of machines and equipment for overhead transmission, underground cable laying and railway catenary lines.

Innovation, quality and service are the key values that we have been spreading all over the world, with brilliant results, for more than 65 years.

A forward-looking company with strong roots, creating sustainable innovation with the lowest impact always with the same Italian passion. OMAC technical core allows us to create custom solutions for every need. Our attentive after-sales service will take care of your needs constantly and professionally worldwide.

## MISSION

Established in Italy, cradle of stringing, Omac combines tradition, innovation and creativity with a global vision. Always oriented to customers' needs, Omac offers custom-made solutions.

## VISION

Focused on innovation and sustainable development, Omac meets the market challenges with research and quality, aiming towards excellence in every business sector in order to meet every single customer's needs.

SINCE 1954

# OVERHEAD LINE STRINGING

**One of the milestones of Omac business.**

For the demanding field of overhead transmission lines, we propose a large range of machines and equipment fully designed by our R&D and made in Italy.

Every single machine is designed in our technical department, manufactured in our factory and tested in our testing field, everything made in Italy with care and passion.

We are inspired by technical innovation and all our machines hold the most advanced 4.0 technology.

**PULLERS, TENSIONERS, PULLER-TENSIONERS**

**FROM 10KN TO 360KN STRINGING CAPACITY**

**4.0 TECHNOLOGY**

# UNDERGROUND CABLE LAYING

**One of the most growing fields for OMAC involve the underground cable laying, for which we manufacture machines and equipment for low/medium/high voltage underground cables, for optic fiber and pipe renewal.**

Innovation inspires us to create the best underground cable laying machines and expand our offer with innovative options fully 4.0 technology equipped.

**PULLERS AND CABLE-DRUM TRAILERS**

**EQUIPMENT FOR OPEN TRENCH AND INSIDE PIPES  
(cable recovery and pipelines renewal)**

**FROM 8KN TO 600KN LAYING CAPACITY**

**FULLY SUSTAINABLE ELECTRIC PULLER WITH LOW  
EMISSIONS AND ZERO NOISE**

## RAILWAY LINE STRINGING

The most increasing sector targeted by OMAC, where we are able to apply our creativity and innovation for custom solutions.

OMAC systems are specially designed and created in Italy for both stringing and recovering the contact and suspension wires of railway transmission lines. Every system, according to the number of wires, can be supplied with up to 4 independent circuits.

OMAC systems are equipped with high-precision electronic devices assisting the operator during the stringing work.
