

TAIL-STOCK REEL-STAND MAX LOAD 900 kN

Reel-stand suitable for steel reels, fit for lifting and braking reels during cable laying operations. The reel-stands is equipped with tail-stocks replacing the traditional shaft system for quick and easy reel loading and unloading. In addition the tail-stock system allows use of reels with oversized width. Optionally, the reel-stand can be hydraulically driven.

FEATURES

Max load of a pair of reel-stands	Braking torque		Performances with hydraulic drive opt. 408			
	with 1 brake (standard)	with 2 brakes (opt. 423)	Braking		Recovering	
			Max torque	Speed	Max torque	Speed
