F10.100

Trailer fit to transport and unwind reels of cable weighing up to 8000 kg.

TRAILER FEATURES

DIMENSIONS	7,30x2,50x2,70 m
TOTAL WEIGHT WITH DRUM	10000 kg
DRUM MAX DIAMETER	3200 mm
DRUM MAX WIDTH	1500 mm
Performances with opt. drive (opt. 408.4 or 408.5)	
PULLING FORCE	0 - 9 kN
PULLING SPEED	0 - 60 m/min

ALSO AVAILABLE TRAILERS WITH DIFFERENT CAPACITY

CONFIGURATION

- Spindle rotating on ball joints, with arm for close and drag the reel, and collars for wooden reel
- Safe mechanical locking in working position
- Mechanical locking of the spindle rotation for safe transport
- Hydraulic reel lift with hand pump
- Single rigid axle and rigid towing assembly
- Towing speed 40 Km/h
- 12V light system
- Hand parking brake for trailer
- Front support

OPTIONAL DEVICES

425 Mechanical back supports

005.1 Damped tandem axle, towing speed 60 km/h. Complete with ABS system

005.3 Damped tandem axle, towing speed 80 km/h. Complete with ABS system and pneumatic suspensions

018.11 Framework made of 3 steel sections for container

029.2 Electric start of the diesel/gasoline engine, with battery

408.4 Hydraulic drive with quick connections for controlling the reel rotation both recovering and releasing cables, complete with power unit and gasoline engine

408.5 Hydraulic drive with quick connections for controlling the reel rotation both recovering and releasing cables, complete with power unit and diesel engine

410.1 Disk brake with manual regulation of the braking to keep under control the unwinding
